Overview Integration

Marketplace Integration

The image displays two screenshots of a software interface. The top screenshot shows the 'Tokopedia Order' management page. It features a search bar, a '+ Add Tokopedia Order' button, and a table of orders with columns for Name, Created SO, and Order Status. The bottom screenshot shows the 'Sales Order' management page, which has a similar layout but with a table of sales orders. A yellow arrow points from the '+ Add Tokopedia Order' button in the top screenshot to the Sales Order table in the bottom screenshot, indicating the integration flow.

Project Goals

1. Integrasi Data Real-Time

- Sinkronisasi otomatis antara ERPNext & E-Commerce (produk, harga, stok, pesanan, pelanggan, pembayaran)

2. Otomatisasi Proses Bisnis

- Mengurangi input manual, meminimalkan kesalahan data
- Proses fulfillment lebih cepat dan akurat

3. Otomatisasi Proses Bisnis

- Laporan keuangan, stok, dan penjualan selalu up-to-date
- Mendukung keputusan bisnis berbasis data real-time

4. Skalabilitas & Omnichannel

- Mendukung penjualan multi-channel (marketplace, toko online, offline)
- Mempermudah ekspansi ke platform E-Commerce lain di masa depan
